

MICROSEALANT® PUTTY TAPE
DOUBLE SIDED SEALANT TAPE

Extremely versatile - use it as a watertight gasket to seal between two surfaces. Save on roofing charges by installing equipment curbs and roof flashings on any type roof yourself. Twist it into a rope to seal around pipe and electrical penetrations through walls and roofs. High-tech MicroSealant stays flexible from -70° F to over 210° F and is guaranteed not to dry out, crack or lose its grip over time.

ROOFSEAL®
MICROSEALANT® ROOF REPAIR TAPE

The #1 choice of professional roofers with over 100,000,000 feet sold! MicroSealant Technology allows tape to "wet-in" to the surface it is applied to, fusing at a molecular level to all roof types including EPDM (Rubber), TPO, Hypalon, aged PVC, BUR, Modified, Shingle, coated Metal, Copper, etc. making a perfect seal that will not harden, shrink, crack or fall off!

ETERNA PRIME®
SPECIALLY FORMULATED SURFACE PREP

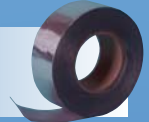

Creates a stable surface for installation of EternaBond tapes. Prepares surface for repair (old tar, gravel, oxidized surfaces, brick, mortar, etc.) Allows installation of EternaBond tapes to -20°F

WEBSEAL®
FABRIC BACKED DUCT SEALING TAPE

Amazingly easy to work with, fuses at a molecular level to all types of ductwork, drain pans and more. MicroSealant combined with reinforced woven fabric creates the perfect answer for making flex duct connections and high pressure SpacePak and Unico ductwork 100% air tight once and for all! Sticks on contact even in dirty attics! Great for making existing flex systems title 24 compliant! Will never dry-out, crack, peel, lose its grip or fall off like all other duct sealants & tapes eventually do.

ALUMIBOND®
HEAVY DUTY DUCT SEALING TAPE

THICK, 4 mil aluminum, combined with EternaBond's MicroSealant is simply the strongest, longest lasting metal tape available anywhere. Will outlast the ductwork, drainpan, or almost any other surface on which it is used. MicroSealant wets-in to the surface it is applied to, fusing to it at a molecular level. Stays flexible, will not lose its grip. Use on drain pans, equipment panels, high pressure ductwork, indoors or out, hot or cold.

Duct Sealing Tape: 2 mil aluminum with hybrid sealant also available

ETERNA CLEAN®
SPRAY CLEANER

Helps release contaminants like oxidation, grime, oil and grease before application of MicroSealant tape.

NEW From EternaBond

ETERNAPOCKET
AND
PITCH POCKET SEALANT

A WATERTIGHT, EASY TO INSTALL PITCH PAN FOR NEW OR EXISTING ROOF PENETRATIONS.

No need to disconnect linesets or cut piping or vents.

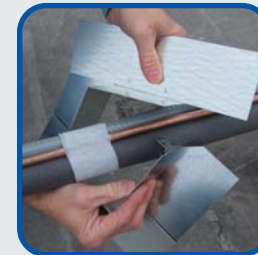

Now you can run the lineset first, then just wrap the EternaPocket around the penetration apply MicroSealant Putty Tape to roof and peel & stick for a PERMANENT waterproof installation.

Connect as many together as you need for larger size penetrations.

Works on all commercial or residential roof types.

Each kit contains 1 4x4 pan and enough MicroSealant putty tape to install 1 pocket. Sealant sold separately.

**Easy to use - Do-it-yourself . . .
 Saves Time . . . Saves Money!!!**
