

Easy Flashing Repair Detail

Figure 1: Apply EternaBond DoubleStick to wall in mortar joint. Remove 2nd (top) release film.

Figure 2: Apply EternaBond RoofSeal or RoofSeal-Plus bridging from wall surface to flashing tins or over termination bar to roof type (Modified, EPDM, TPO, Hypolan, etc.)

Figure 3: Roll or rub with pressure. Complete! By combining EternaBond DoubleStick and RoofSeal you have made an EternaBond MicroSealant tape with a custom profile to match the wall profile.
